"FOLDING PORTABLE TELEPHONE"

The following is an English translation of an extract of the above application.

A folding portable telephone disclosed here is integrally formed by pivotably coupling two divided cases 1 via a hinge part 3. An incoming information display part 20 is provided on an outer surface of the case 1. This incoming information display part 20 is provided with a character display part 21. The character display part 21 produces a display using an LED as a backlight.

AV: 2001-136247

"FOLDING PORTABLE TELEPHONE"

A first display means 4 composed of a liquid crystal display device or the like is provided on an outer surface of a first main body 1. A second display means 5 is also provided on an inner surface of the first main body, and an antenna 9 is provided on a side of a second main body 2 so that it can be insertable and extractable and obliquely upward. A hourglass 10 and a cumulative telephone speech time 11 are displayed on the first display means 4 while providing a speech time information in analog and digital manners. When an incoming call is received, the first display means 4 erases the speech time information, and a display 12 indicating the incoming call is received, a caller's name 13 and a telephone number 14 of the caller are displayed as incoming call information instead.
